Lynn Kunzler  
Senior Reclamation Specialist

Lynn Kunzler:

In regards to the letter that we received on March 25, 2003 for the Dove Gray Quarry.  
Operation Plan (rule R647-3-106)

(4) Description for mining operations:

We take the landscape rock and flagstone off the top 10 feet, which we consider to be an over burden. The material on the North edge of the quarry. We have now found a massive rock seam in the hill. We have drilled and removed the stone which was 4x8 rock samples, that was shipped to our Gunnison facility to process the materials for ASTM standers. That is required for the Building Institution and for the architects.

There was about 1 1/2 acres of disruption on the location do to our surface explosion We are not quarrying this area. We needed the material for ASTA standards to know if we could quarry this site. Our attention is to take the landscape rock and block from that site and bring to our Gunnison facility.

There are new roads on this sit. All the roads were existing when interring the property

If you have any question on this please call the office BH Stone Supply (435)528-5342.

Sincerely

If you have any question on this please call the office BH Stone Supply (435)528-5342.

Sincerely
